Professional Summary

Front-End Developer with approximately one year of hands-on experience developing React and TypeScript-based web applications in a real-world banking environment. Experienced in building responsive application screens, reusable components, frontend business logic, and integrating REST APIs using Swagger-based API contracts. Practical exposure to co-operative banking workflows, client management, account operations, authentication, loans, and other banking application modules. Strong foundation in JavaScript, TypeScript, React, API integration, and modern frontend development practices.

Education

School Of Information Technology Indira University, Pune <i>Master of Science in Computer Applications (MSc CA) — GPA: 8.09</i>	2025 – 2027
Indira College of Commerce & Science, Pune <i>Bachelor of Science in Computer Science — CGPA: 7.14</i>	2022 – 2025

Experience

Front-End Developer / IT Intern <i>EagleX InfoSolutions Pvt. Ltd.</i>	[START DATE] – Present <i>Pune, India</i>
– Develop and maintain frontend screens for a co-operative banking application using React.js, TypeScript, JavaScript, HTML5, and CSS3. – Integrate frontend applications with backend REST APIs using Swagger documentation to understand API contracts, request/response structures, and business requirements. – Build reusable React components, TypeScript interfaces/types, custom hooks, and frontend logic to support scalable feature-based application development. – Develop banking application functionality including client management screens, client listing, search, filtering, pagination, forms, and frontend validations. – Contribute to frontend modules across areas such as Accounts, Authentication, Client Management, Dashboard, Fixed Deposit, and Loan based on assigned requirements. – Work closely with the development lead and backend team to understand API requirements, implement corresponding UI functionality, troubleshoot issues, and deliver application features. – Gain practical exposure to co-operative banking workflows and translate business requirements into functional frontend screens and user interfaces.	

Key Project Experience

Co-operative Banking Application React.js, TypeScript, REST APIs, Swagger	Professional Experience
– Contributed to frontend development of a banking application designed to support day-to-day co-operative banking operations and workflows. – Developed React and TypeScript-based screens and components by consuming backend APIs provided by the development team. – Implemented client management functionality including client listing, search, filtering, pagination, and related application screens. – Worked with feature-based frontend architecture involving API modules, components, screens, data models, and custom React hooks. – Implemented frontend functionality based on API responses and banking business requirements while debugging and resolving UI and integration issues.	

Technical Skills

• Languages: JavaScript, TypeScript, Java, Python, SQL • Frontend: React.js, HTML5, CSS3, Responsive Web Development • React: React Hooks, Custom Hooks, Components, Forms, State Management • API: REST APIs, API Integration, Swagger	• Database: MySQL, SQL Server • Tools: Git, GitHub, Visual Studio Code • Concepts: OOP, DBMS, Data Structures, Frontend Architecture • Domain: Co-operative Banking Applications
